More Info

Origami Earrings Crane

These origami crane earrings are handmade by an origami artist using small 3 cm (approximately 1.2 inch) square origami paper.

Sakura no Shizuku Earrings

Handmade by the artist using wire and epoxy resin. The composition color is expressed through the layers and the number of times it is applied. The earrings have shine and transparency while being lightweight and comfortable to wear.

Acrylic Hair Accessories

Our most popular hair accessory uses CHIRIMEN fabric with vibrant colors in acrylic resin. We have various items, such as hair clips and hair pins available. We carefully select colors and patterns based on the design and size of the item.

What is CHIRIMEN

CHIRIMEN is Japanese fabric made from polyester, or rayon, silk with a distinctive crinkled texture. We achieve the crinkling effect by tightly twisting the threads during weaving.

Features of CHIRIMEN fabric used by COCOLUCK

Our 100% polyester material doesn't fade or shrink even when washed.
